	15	㇇	横折弯钩	九	31	㇉	斜钩	我
	16	㇈	横斜钩	飞	32	㇊	卧钩	心

Number of chinese characters: 28.318 Number of words: 179.753

Simplified words: 108004 Traditional words: 108233

Characters beyond the first 9 options:

Simplified (freq.: lingua.mtsu.edu):

jjuo 藥 3734	xhjo 嚟 5351
njuo 藥 3734	題 5105
ejoo 類 4915	kxho 礅 5772
jhmo 長 4933	碇 5856
nhmo 長 4933	yhso 銀 5941
jnhoo 聒 5209	pxjg 鮑 5959
綦 5599	jnxn 難 5970

Traditional (freq.: technology.chtsai.org):

jjuo 藥 3572	njjh 药 5624
njuo 藥 3572	jjjh 药 5624
yveo 秝 5100	jjjn 董 5631
hnjo 礪 5135	njjn 董 5631
jnxo 鞅 5412	pxjn 鯢 5650
觀 5454 策 5879	jjgo 莢 5661
kxho 屨 5477	xjgo 噴 5724
戛 5769	xhjo 瞞 5811
pxjh 鮒 5613	wjgo 漚 5821

Single character – 6 letter codes: write the first 10 strokes and the last 2.

If only 1 stroke is left, use the appropriate key that ends with a horizontal stroke, and add "z" characters at the end until the character is found among the options (usually one "z" is enough).

謝 THXKXC 錯 OHCYJH

的 UGKS 一 HZ 不 KCZ 了 FZ

Single character – 4 letter codes: write the first 6 strokes and the last 2.

If a character starts with one of these radicals: 虫 木 竹 足 目 扌 馬 車 金 糸 言 食 門
the corresponding key counts as the first 2 strokes.

蚬 SMVZ 棧 DMEE 策 FWGO

趾 JNND 眈 KKDT 搯 LEJH

謝 IUGC 錯 RJNH

的 UGKS 一 HZ 不 KCZ 了 FZ

Multicharacter combinations:

If a character starts with one of the radicals, the corresponding key counts as the first 2 strokes.

If a multicharacter combination contains a character that is not a Chinese character, such as “.” in “大卫·艾登堡”, then that character is written with the letter “z”.

If a character in a multicharacter combination is normally written with multiple letters, and there are not enough strokes, such as “一” in “不一样”, then you complete the code by writing “z” at the end.

Two characters: Write the first 2 and last 2 strokes for the first character,
and the first 4 and last 2 strokes of the last character.

The most common two character combinations can be written with the first three letters of the code.

你好 UODMN 我们 YOURG

你好 UOD 我们 YOU

Three characters: write the first 2 strokes from the first character, first 2 and last 2 strokes from the second character, and first 2 and last 2 strokes from the third character.

为什么 EUJPT 不一样 KHDJZ

Four characters: write the first 2 strokes from the first three characters, and the first 2 and last 2 strokes from the last character.

生日快乐 YXWPO

Five characters: write the first 2 strokes from the five characters.

中国共产党 XXJTC

More characters than five: write the first 2 strokes from each of the first five characters.

中华人民共和国 XUOGJ

大卫·艾登堡 KFZJS
